ALUSION

A unique new material offering a spectacular new look to the A&D community

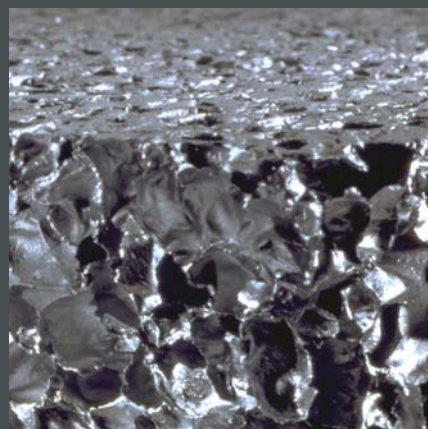

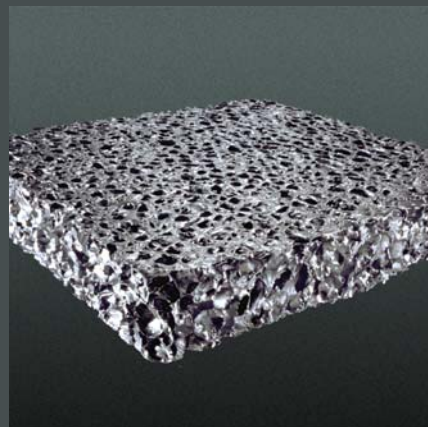

Modern and dramatic, Alusion melds the metallic beauty of aluminum with the natural wonder of frothing water.

Alusion is non-combustible, with a Flame Spread of Zero

Alusion offers Sound Absorption Coefficients up to 0.92 at higher octaves

Alusion is 100% recyclable, and can be manufactured using recycled aluminum.

Alusion has the unique look and is ready to make your next project a signature project.

ALUSION OFFERS SURFACE BEAUTY

And so much more.

UNIQUE LOOK

Raw, edgy, industrial, dramatic, Alusion articulates your strong design statement. Alusion is distinctive and striking.

SAFETY

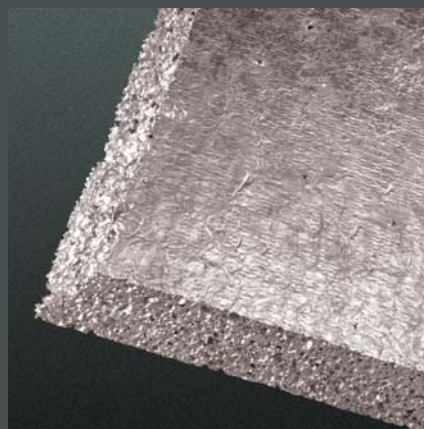

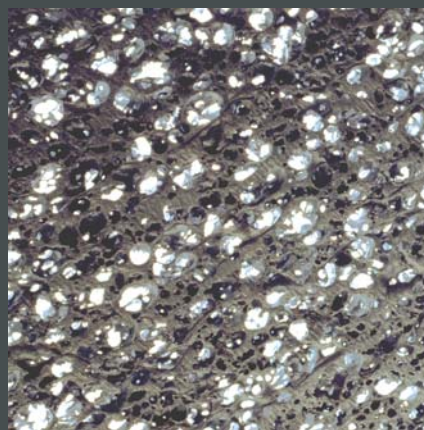

Alusion meets fire codes.

ENVIRONMENTALLY FRIENDLY

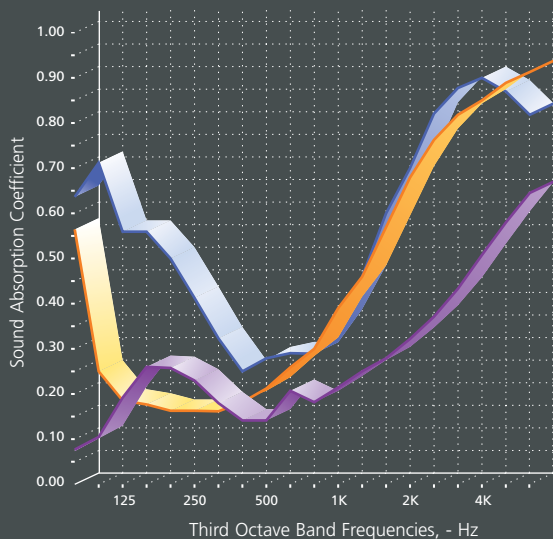

Alusion is 100% recyclable.

ACOUSTIC ABSORPTION

Alusion offers a unique absorption curve for the acoustician to 'tune' a space.

APPLICATIONS

Alusion presents new vistas in the material world:

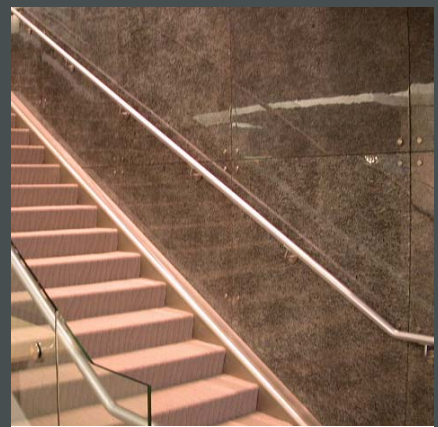

Some possibilities

- Treatments, for a feature wall.
- Resin or glass coated, for retail flooring or transaction surfaces.
- Suspended ceilings, for acoustics in large spaces.
- Fixturing, for retail.
- Signage and exhibits.
- Backlit, for any number of interesting effects.
- Or, as your imagination offers!

The versatility of Alusion extends to its manufacture and usage:

- Alusion is available in two standard forms: Large Cell and Small Cell.
- Alusion can be cut and shaped using normal carbide-tipped blades.
- Alusion is easily maintained and corrosion resistant for outdoor installations.

SHEET SIZING

Alusion sheet products are available in 4' x 8' as standard, longer sheets are available on a special order basis.

Standard thickness is 1/2", 1" & 1 1/2" with other thicknesses also available on a special order basis.

FINISHES

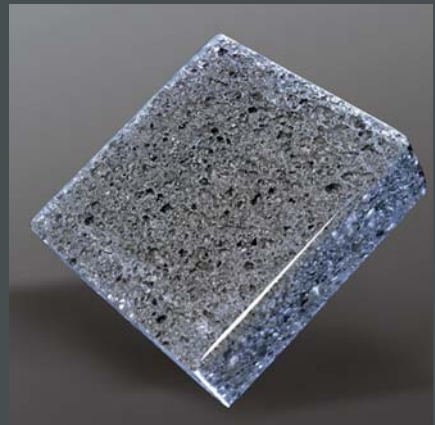

- Natural, as cast, with a continuous skin
- Open Cell, with the skin removed from one or both sides of the sheet
- Resin Coated
- Translucent, with the skin removed from both sides in a manner that allows through lighting
